

CAC — Apprenticeship Pathways & CPL · Run Sheet

California Apprenticeship Council, 13 August 2026 · 15-minute slot · 13:00 of script + 2:00 buffer · figures live as of 10 Aug 2026

Timing ladder

Time	Clicks	Slide	The one thing it must land
0:00	—	1 · Title	Who you are, what they're about to get. 15 seconds.
0:15	—	2 · What is CPL	An evaluation, not a waiver. Faculty approve every one.
1:00	—	3 · The problem	49,696 have CPL. 589 are apprentices. Enormous runway.
2:00	—	4 · Sprint goals	Four goals; Goal 2 is the next four slides.
3:00	—	5 · Four apprentices	Four doors. One of them is standing in your workforce.
4:15	3	6 · One road	Same road every trade. CPL = 26–38 of the 60 units.
5:30	3	7 · Carpentry	26 units . Nobody took a class they didn't need.
7:15	3	8 · Ironworkers	29.5 vs 38 for the same trade — name it, don't hide it.
8:45	3	9 · Fire / Cal JAC	One college, academy to bachelor's. Nobody transfers to finish.
10:00	—	10 · Portal video	CHECK AUDIO BEFORE THE SESSION . Fallback script is in the notes.
11:00	—	11 · Scaling	Step 1 is already done. Adopt, don't build.
12:00	—	12 · Next steps	Say the email address twice, slowly.
12:45	—	13 · Contact	Close. Land at ~13:00.
—	—	14–15 · Appendix	Not presented. Course lists, if a skeptic asks.

Running behind? Cut slides 5 and 11 to their headlines — that recovers about 90 seconds. Slides 6–9 each build in **3 clicks**: the road → who does what → what it's worth.

Numbers you can say out loud (live dashboard, 10 Aug 2026)

- **49,696** Californians with CPL documented on the MAP platform — 26,689 military, 23,087 workforce/other, **589 apprentices** (~1.2%).
- **\$313M** in student savings to date; **\$1.24B** 20-year economic impact. Apprentice share: \$10M / \$38M.
- **12,517** faculty-approved credit recommendations — Standardized Assessment 6,543 · Industry Certification 3,522 · Credit by Exam 1,843 · Portfolio 402 · Military 116.
- **2,111** MAP exhibits (138 statewide, 1,973 local) from 87 originating colleges; 103 active colleges.
- **Colleges that could adopt an existing statewide exhibit today, and haven't**: Computer Info Systems 74 · Automotive 65 · EMS 59 · Kinesiology/Health 56 · Administration of Justice 55 · **Fire Technology 45** · **Welding 27**.
- Cal-JAC covers roughly **14,000** first responder trainees. AI apprenticeship CPL tools are piloting at Santiago Canyon and Norco with the construction trades and IBEW.

Three things to check before you present.

- **The 44% withdrawal figure**. "44% of California apprentices withdraw before completion (DAS, 2000–2026)" is a strong retention argument, but it is **not** from our dashboard — it reaches us through a CTE policy source citing DAS. **DAS will be in the room**. Confirm with them first, or attribute it to them out loud rather than asserting it.
- **Apprentice headcount**. Older documents say 692 or 755. The public dashboard says **589** today. Use 589.
- **Appendix unit totals**. Carpentry lists 12 courses / 20.0 units against 26 cited; Cerritos lists 15 / 31.5 against 38. Rows ran off the bottom of the original graphics. American River reconciles exactly at 29.5. Confirm before the appendix circulates.

If you're asked about pre-apprenticeship

Three mechanisms (Sam Lee, 10 Aug 2026). A pre-apprentice can earn CPL from **(a)** noncredit coursework at a college, **(b)** an industry certification — welding is the obvious one, and **(c)** it can **clear admission requirements** for the apprenticeship itself and for other programs.

(c) is the one for this room. At stage 1, CPL isn't only credit banked for later — it can be what gets someone through the door sooner. The people who set apprenticeship entry requirements are in the audience. That makes it an ask, not just an observation.

The deck already shows (a) and (b) — no new slide needed. Stage 1 of the Ironworkers slide reads "Cerritos College — Noncredit Welding" and "American River College — Welding Credit Program," both under "Welding Apprenticeship Preparation." That box is pre-apprenticeship CPL. It just isn't labelled as such. Pointing at it is the most concrete way to make the case.

- **The high-school route has a catch worth knowing.** High-school CTE articulation is CPL — specifically credit by exam under Title 5 §55050 (1,843 such recommendations live in MAP). ~48 high schools are already MAP learning partners, including Garden Grove High School on the Carpentry slide. **But CSU does not recognise high-school CTE articulated credit for transfer — it does recognise credit by exam.** Transcribed the wrong way, a pre-apprentice's credit dies at the CSU door, and every pathway in this deck ends at a bachelor's.
- **Where the noncredit route is empty — the cheap win.** ROPS: 2–3 entries in MAP (Baldy View). Adult schools: 2 (Fontana). The four standalone noncredit institutions — North Orange Continuing Education, San Diego Continuing Education, Mt. SAC Noncredit and Calbright — appear on **zero** credential titles, even though noncredit coursework is a named source of pre-apprenticeship CPL. That gap is data entry, not policy.
- **A story that proves stage 1 matters.** Rocio Garcia started in adult school, received 16 units for her California Registered Dental Assistant certification, finished her bachelor's a semester early, and is now a full-time tenure-track professor at West Los Angeles College. Cleared for use by name.

Sources — live figures: CPL Project Dashboard / live_metrics.json and fact_sheet_metrics.json, scraped 10 Aug 2026 13:50 UTC. Programme context: CPL Initiative Report 2026 (public knowledge base). Pre-apprenticeship and learning-partner evidence: Noncredit & Learning-Partner CPL thinking document (COBI). Naming: "CPL Initiative" and "MAP platform" — never "MAP Initiative."
